Greg Grissett Publishes Part II of Article in Orthopedic Design & Technology Magazine

October 4, 2021

On September 14, 2021, Offit Kurman Principal and Chair of the Intellectual Property practice group, [Greg Grissett](#) published *Medical Device IP Strategy, Part II: Creating A Patent Strategy To Mitigate Risk - Covering the specialized field of orthopedic product development and manufacturing* in the *Orthopedic Design & Technology* (ODT) Magazine. This article is the final publication of the two-part series that covers how to create an IP strategy, and in particular, a patent strategy, that stands above the rest.

Read about part one [here](#).

Orthopedic Design & Technology continues to be recognized as an industry-leading publication, widely known for its in-depth, high-quality coverage of the specialized field of orthopedic product development and manufacturing. With every issue, *ODT* offers readers comprehensive feature articles, industry news, trends, and up-to-date market data on the ever-evolving orthopedic sector. Regular departments and columns provide must-read information on regulatory and legal issues, design trends, best business practices, manufacturing efficiencies, new technology developments, and much more.
